

### “SURPRISING PERFORMANCE”

“The new *Ace* series sports an entirely new appearance from other Garrett detectors both in the shape of the control housing and its unique color . . . . a vibrant yellow! The entire detector has been ergonomically designed and is well suited for long periods of use with no fatigue even by younger treasure hunters. The *Ace 150* weighs a meager 2.7 pounds and extends from 42” to 51” in length..

“The new *Ace 150* offers surprising performance as well as features not found on detectors anywhere near this price range. Its intuitive controls and lightweight make it an ideal detector for competition hunts, novices or as a back-up detector. It is a detector that makes treasure hunting fun and does so without putting a dent in your wallet. The only drawback to the *Ace 150* is that it does not have a non-motion pinpoint mode; however, with a little practice, targets can be pinpointed fairly accurately.”
