

“FIND MORE KEEPERS”

“Even in highly mineralized ground that rendered some other top-of-the-line detectors virtually useless, the *GTI 1500* was able to make some nice finds including coins dating back to the 1800s, Civil War relics and artifacts from a World War I training camp that has been heavily hunted for more than 20 years.

“The *GTI 1500* incorporates most of the features found on the *GTI 2000* in a smaller, lighter package making it well suited for all members of the treasure hunting community. I found that the weight and balance of the unit combined with the wealth of information it provides makes the *GTI 1500* ideal for virtually all forms of treasure hunting. The TreasureVision™ circuitry combined with the above-average performance of the unit will enable beginners and professionals alike to find more “keepers” in a given amount of time — even if there is a high concentration of junk in the area.”
