

Scorpion® Gold Stinger

MORE THAN A PROSPECTING MACHINE

“While the name “*Gold Stinger*” implies that this latest addition to the Garrett line has been designed strictly for prospecting, my experience in the field showed that it performed extremely well in other applications as well. The 16-turn ground-balance control combined with the full-range discriminate circuit and double-D elliptical searchcoil allows the *Scorpion* to be used quite effectively for coin hunting, relic hunting, and beach hunting.

“A full range of optional searchcoils is available...which allows the *Gold Stinger* to fulfill nearly all of your treasure-hunting needs.”

The full review by Andy Sabisch was published in the January 1991 issue, page 8, of:
