Garrett Metal Detectors®

U.S. Searchers Make Big Finds Abroad

Those American metal detectorists who are fortunate enough to occasionally travel overseas know just how old, and how exciting, their finds can be in other countries.

Two such people who have sent in their stories to Garrett are Ellen J. of Dallas, Texas, and Thibault D. from Mamaroneck, New York. Their stories are quite different but they were each excited by what they experienced.

Ellen, a member of the Lone Star Treasure Hunters Club, has spent the past four summers volunteering as a metal detectorist on archaeological projects in Israel. Her first adventure was in May 2013 on the Khirbet el Maqatir dig, where she found herself to be the only experienced detectorist.

"From that two week dig, I was hooked," she says. "I consider it a blessing to combine two hobbies, metal detecting and archaeology, and I've been going back to Israel every summer since."

The detecting began in 2009 when she purchased a *GTI 2500* at the Texas State Fair. Ellen has since added the *ACE 250*, *AT Pro*, and the *AT Gold*. During her first season in Israel in 2013, she found more than 200 coins while helping the archaeology team.

In 2014, she raised her coin total to 300, and added another 250 coins in 2015. Ellen shared "My goal in 2016 was to cross the 1,000 coin all-time total for Khirbet el Maqatir," said Ellen. "That was done in the first week. The dig director even made a special video of the 1,000th coin. I found 200 more the next two weeks, so we topped 300 for this year and brought the all-time total to over 1,200 coins."

These coins range over many centuries, but the majority are between the 2nd century BC/BCE to 1st century AD/CE—

Dallas native Ellen J. seen with her *AT Gold* working an Israel archaeology project. Her best find of 2016 was this 135 BC silver shekel (seen below), which features an eagle on the reverse and an imperial profile on the obverse.

making them all in the neighborhood of 2,000 years old. The archaeology projects she joins usually stretch two to three weeks, and many of the low denomination bronze coins are not all beauties.

Ellen's best coin of 2016 was found using her *AT Gold*, which she uses to go back through dirt piles after sections of soil have been sifted. "I was going over new dirt in the dump when the high tone signal rang loud and clear," she said. "I used the pinpointer to zero in, brushed aside the dirt,

and my heart leapt when a large silver coin appeared."

Their Israeli numismatist identified the coin as a Tyrian silver shekel of Antiochus VII, minted in 135 BC in Tyre.

Fourteen-year-old Thibault has already been detecting for about seven years now. He had the chance to detect on private land while visiting the home of his grandparents

(continued on pg. 3)

Finder: Angela L., Travagliato, Italy
Using: *AT Pro International*

Garrett's Code of Detecting Ethics

Charles Garrett always urged his fellow searchers to conduct themselves as responsible treasure hunters and to leave their hunt areas in better condition than they found them. Here are just a few of his keys to good conduct in the field:

- Never trespass or hunt on private property without permission.
- National and state parks/monuments, etc. are absolutely off-limits.
- Always fill in every hole that you dig.
- Do not leave litter or other discarded junk items lying around.
- Always carry out all rubbish and dug targets with you when you leave a search area.
- Use reasonable caution in digging toward any target, particularly in areas where you are uncertain of the ground conditions.
- Keep informed on and obey all local and national legislation relating to the discovery and reporting of found treasures.

in France. He found five King Louis coins that date to the 1700s.

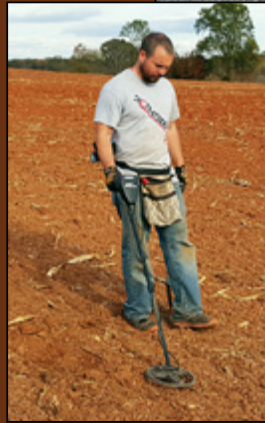

"That was crazy for me!" Thibault said. "It was the best find ever." He continued to hunt old fields around his grandparents' home with his *ACE 250* and managed to top his 300-year-old King Louis coins just a few days later. His best discovery came in a field where a village had once stood many years ago.

"The coin was about six inches down and rang up kind of like a ring," he said. It was a coin from the reign of King Henry III, who ruled France from 1574 to 1589.

"When I asked my parents for a metal detector, they thought I wouldn't find much because I was just a kid and didn't have much experience," Thibault said. "But Garrett machines are so good that it almost does the work for you. When I showed them this coin, they were blown away!"

(Above, below) This King Henry III coin was found by 14-year-old Thibault D. of New York with his *ACE 250* while he was visiting his grandparents in France.

Finder: John G., Anderson, SC

Using: *AT Pro*

Find: I turned 35 years old on the 30th of October. For my birthday, my wife let me take a trip north, with a hunting partner, in search of Civil War relics. I'm mainly a coin shooter but a Civil War bullet has always been on my bucket list. We ended up in Culpeper,

VA at the base of Cedar Mountain. On August 9, 1862 a battle took place here called "The Battle of Cedar Mountain" also known as "Slaughter's Mountain" or "Cedar Run". We ended up finding numerous Civil War relics. Not only did I find over 25 Civil War bullets, I also pulled a piece of a cannon ball and a complete canister shot. I used the *AT Pro* and the *Pro-Pointer AT* on this hunt and I couldn't have been happier. Your equipment never ceases to amaze me and this trip was no different. Thank you, Garrett, for making such a great product.

Find: On August 29, 2015 Battalion Chief Robert Mercado rolled his department vehicle. The cause of the crash was a faulty tire on the passenger side rear tire. The tread completely delaminated at freeway speeds on California Highway 101 in Santa Barbara County. My boss lost his wedding ring as it was in a container on the center console. We firefighters don't usually wear our wedding rings for safety while at work. I volunteered two weeks ago to go to the crash site to attempt to find his ring. Another captain that I work with joined us along with a supervisor of the California Highway Patrol. He used his cruiser to provide safety and emergency lights while we searched the rollover site of approximately 50' x 50'. It took us approximately 45 minutes to find the ring using your fine equipment. Your Pro-Pointer made all the difference. I truly believe we would not have found the ring if not using your Garrett equipment.

Find: I took my kids out metal detecting at a local park. The park was closed due to a flood on Memorial weekend in San Marcos, TX. We have detected this park before, with no luck. But this past week we found gold on every visit to the park. The flood exposed bedrock that was covered with exiting finds. The first day we detected a 14k gold heart ring wedged between the rocks. Every day after we detected more gold rings, as well as a diamond earring, a Mexican Peso, jewelry, and what looked like arrowheads, but were Hawaiian lures. The picture shows five days of detecting including the trash found. My kids enjoy watching Nugget Noggin on YouTube, so I'm happy they also have something exiting to share.

Find: Several weeks ago my community started a street tear-out project around our town square. The town was founded in 1882. Myself and another detectorist have been digging the site every night. We have dug over 100 coins from the 1800s. The oldest coins are a pair of 1858 Flying Eagles. The picture shows a pile of some of the coins including the Flying Eagles, Indian head pennies, Seated Liberty and Barber dimes, and some Shield and V nickels. At the top of the picture is a set of wedding bands. The man's is stamped "14K Cripple Creek" and the woman's says "18K". They were dug several inches apart.

Finder: Jody H., Bonham, TX
Using: *ACE 250*
Find: On the afternoon of June 7, 2016, local historian Jody wanted to metal detect a curbside area where his research had revealed The Bonham National Bank stood in 1892 but is now the location of Bonham Floral & Green House.

He entered the business and asked permission from the employees to use his metal detector on the south side of the building. The business staff granted his request. The employee, being interested in history herself, requested to see any items dug up. Jody detected the site with his Garrett *Treasure Ace 250* and found some loose change but also located a beautiful silver ring with a unique design.

As requested, Jody showed the business staff what he had located. An employee, who was not there previously, was taken aback when she saw the ring. She exclaimed, "This is Abby's lost ring!" The store owner came up and verified it was her daughter's ring that had been lost. She stated that Abby had no idea as to where the ring had been lost but certainly didn't feel it was where Jody had found it. The ring was returned to Abby to her delight. Jody didn't find any pieces of historical significance that day but the excitement and smile the young lady was wearing when she was reunited with her special ring was priceless.

Charles Garrett Memorial Hunt

Save the date: April 1-2, 2017

Hunt spaces will be limited: sign-up now!

In honor of our late founder, Garrett is planning a big detecting rally—the Charles Garrett Memorial Hunt, to be held during the weekend of April 1-2, 2017. Those who attend can expect plenty of fun, plenty of prizes to win, and a truly memorable weekend.

The event will be held near the small, historic town of Jefferson, Texas—once a thriving riverport in the 1800s. The Garrett hunt will feature both seeded hunts and native hunting in an area where history dating to the Civil War could potentially be dug.

The Basic Hunt package includes: a free hunt T-shirt (for those who pay before March 1st); participation in up to four prize hunts; a Saturday lunch; park admission; and tent camping in Diamond Don's RV Park, the site of the Garrett hunt. (RVs are additional cost; check directly with Diamond Don's for rates.)

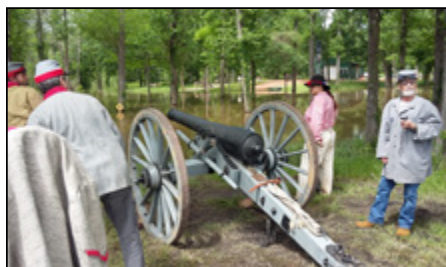

The two big hunts, a Silver Hunt and a Relic Hunt, each require an additional hunt fee. There are six total hunts, each of which offer contestants the chance to win metal detectors, pinpointers, and Garrett accessories as prizes.

The free Kids' Hunt on Saturday, April 1, is open to children ages 12 and younger, and will be split into two age groups. As with each of the hunts, the field will be seeded with some special tokens that are redeemable for Garrett products.

"The Relic Hunt and the Silver Hunt are expected to be the big draws, but the Free Range hunting within the park could well produce some great finds," says Garrett marketing director Steve Moore. "The RV park sits on historic ground alongside a steamboat terminal and through which Civil War-era railroads ran. The property includes one of the oldest dumps of Jefferson, as well as the remains of a factory that helped supply the Confederates during the Civil War."

The Free Range Hunt will be open to all paid participants of the weekend event. With the exception of areas roped off as seeded hunt fields, the entire RV park can be hunted, including the old dump sites. In addition to whatever old coins and relics may turn up, searchers have the opportunity to dig Garrett tokens that will be sprinkled throughout the property.

Diamond Don's RV Park will entertain (weather permitting) with live cannon fire, period actors, and even a floating ironclad replica (*below*). For those interested in the paranormal, Jefferson will also be hosting the History, Haunts and Legends Conference during the weekend of April 1.

"Diggers who take part in the Free Range Hunt will be encouraged to submit their favorite find in several Best Finds categories," Moore continued. "A panel of VIP judges will select their favorite item in each category and award metal detector prizes to the winners."

Hunt packages for the Charles Garrett Memorial Hunt start at \$55, but even non-hunters can enjoy the weekend for a \$5 park entry fee. Kids 12 and under will be admitted free.

Youngsters can also look forward to seeing Civil War reenactors dressed in period costume, a floating ironclad replica, and even live cannon firing. Visitors to the nearby town of Jefferson can visit museums, antique shops, local restaurants, and even ride the town's historic steam engine train.

Using: *AT Pro*
Find: Asian coin, circa 1736-1795

One silver, two silver...220 silver coins!

Finder: Fanel S., Romania

Using: *AT Pro International*

Find: Hoard of 220 silver coins, circa 2nd Century BC, Illyria Dyrrhachium Xenon and Meniskos

"One year ago, on the day that I had dedicated to my hobby, I went in search of new potential locations because of bad weather. From the car, I noticed all kinds of hills, forests and interesting places. I marked them to check if there were archaeological sites.

"At one point, I noticed a very interesting hill because of its position—a hill isolated from the rest—with a river at the base. I told myself, *Surely, it was a Bronze Age settlement, it has all the features.* I wanted to get there in one of my trips.

"The problem is that I simply forgot that hill, and now, a year later, it came back to mind again. So, I took two of my boys and I went to go detect with my Garrett *AT Pro International* to see if my intuition was good.

"When we reached the hill, I left the car at the edge of the forest and we began to climb in order to reach the top of the hill. The ascent was quite difficult due to the steep slopes. We reached the top and there I started to

scan. After the fourth hole, I found the first coin, then another, and another . . . up to 220 coins. They were widespread, so collecting them was quite difficult. They were found over an area of 35-40 square meters and at depth of 5 to 30 centimeters."

The hoard was handed over to the History Museum in Brasov.
